Career Objective

To contribute to an organization by applying my Information Systems knowledge and data analysis skills, while gaining practical experience and continuing to develop professionally.

Technical Skills

Data analysis tools: PostgreSQL, Power BI, Microsoft Excel

Project work: SQL queries, exploratory data analysis, data visualization, sales performance analysis, customer cohort analysis

Projects

Sales Performance and Cohort Analysis

Tools: PostgreSQL and Power BI

- Explored retail sales and customer purchase cohorts using SQL and Power BI.
- Used SQL queries to examine sales by region, monthly sales trends, and customer purchase patterns.
